

Habitat Explorers (Grades 1-4)

Learn about Virginia wildlife living in Wildrock's forest by following the Wildlife Treasure Map.

Along the way, students will:

- find signs of animal and insect life
- learn about Wildrock's efforts to support wildlife by creating habitat zones that provide good food and shelter for animals
- use hand lenses to investigate treasures
- experiment with compasses to identify the direction of the view from the top of Wildrock!

The trip includes an hour of play-based learning on Wildrock's Nature Playscape.
